

**VENTURI-POWERED AUTOMATIC SKIMMER  
DRAMATICALLY ENHANCES SYSTEM EFFICIENCY**

**ADVANCED POWER**

**QuikSkin™**

*The ultimate in surface skimming*

**The ultimate in surface skimming**

**WHAT DOES THE QUIKSKIM DO?**

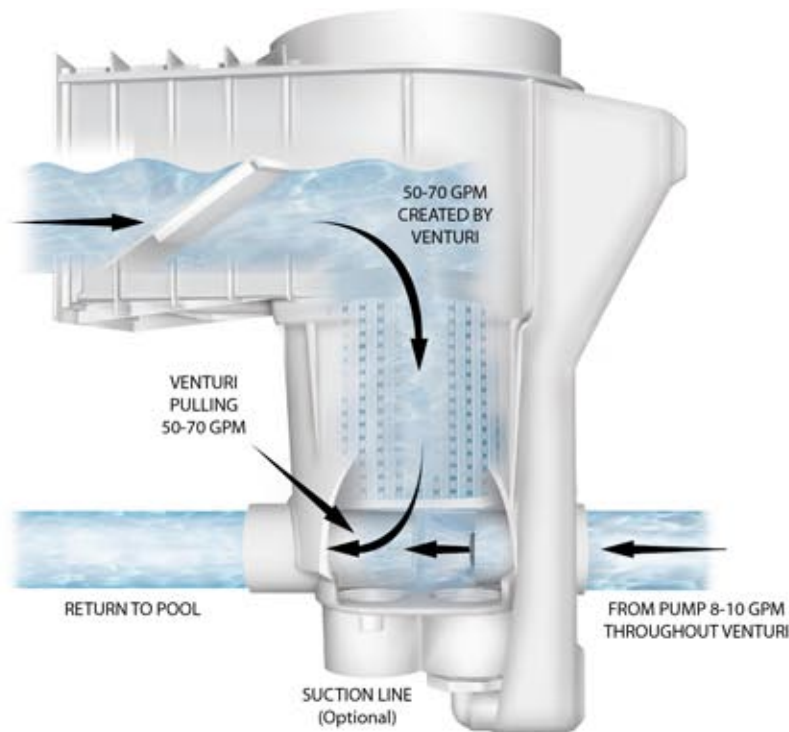

The A&A Venturi-Powered Automatic Skimmer dramatically enhances surface skimming action and circulation. It comes with its own filter sock for easy debris removal, and the QuikSkim actually returns more water to the pool than is initially invested. This increases surface circulation and creates a cleaner, healthier pool.

**EFFICIENT**

With only 8-10 gallons per minute invested into the venturi, the QuikSkim will produce a skimming flow of 50-70 GPM.

**SAFE**

Under normal operation there is no pump suction in the skimmer, so regardless of the water level, the pump cannot cavitate and lose prime.

**INNOVATIVE DESIGN**

QuikSkim's innovative design allows the use of full pump suction to the floor, which aids in debris removal. The significantly enhanced surface skimming removes most debris before it sinks to the bottom. If you choose to use QuikSkim with Quik LeafVac™, the leaves and debris that do fall to the bottom will be pulled in with the pump suction and trapped in a canister before they reach the pump. This helps protect the pump and extend pump life.

**ADVANCED ENGINEERING**

Specially engineered features prevent any suction entrapment by breaking the vacuum if blockage occurs; a patent-pending feature that other skimmers do not have.

**SUPERIOR DIRT REMOVAL**

Silk sock provided for basket to trap ultra fine surface debris.

**INSTALLATION OPTIONS**

Can be installed with or without a suction line from the pump.

**AVAILABLE IN WHITE, GRAY OR BLACK**
